## What is a Heat Pump?

**HOWHOT** pool heating heat pumps are designed to make you get the most enjoyment from your pool. With pool temperatures programmable up to 40°C you can now swim all year round. No longer do you need to have your roof covered with solar panels or spend thousands of Rands on electricity. **HOWHOT's** heat pumps are compact, quiet and very simple to install. It will provide you with many years of trouble free pool heating.

**HOWHOT** pool heat pumps uses the latest in heat pump control technology resulting in extremely low operational cost. For every R1.00 worth of electricity this unit can give you more than R5.00 worth of output heat.

## Key Features
